

Bloody-nosed beetle identification and survey training

Saturday 16th April 2016
11am-1pm

Meet at: the corner of Coalpit Lane and
Ling Lane CV23 9HE
(Grid ref SP436740)

Photo © Michael Slater

This handsome black beetle is out and about from April – September. Sadly it is one of Warwickshire's rarest beetles and we need your help to find out where it is so that we can protect it!

In addition to teaching you how to identify the beetle, this session will induct you into the project so that you can take part surveys over the summer.

Join Richard Brown of Coventry University in partnership with Sustrans and discover all about this fascinating beetle.

For bookings and further information, please contact
volunteers-wm@sustrans.org.uk or 0121 633 5522.
